

ACCESS WebVPN GlobalProtect Client Installation for Windows Computers

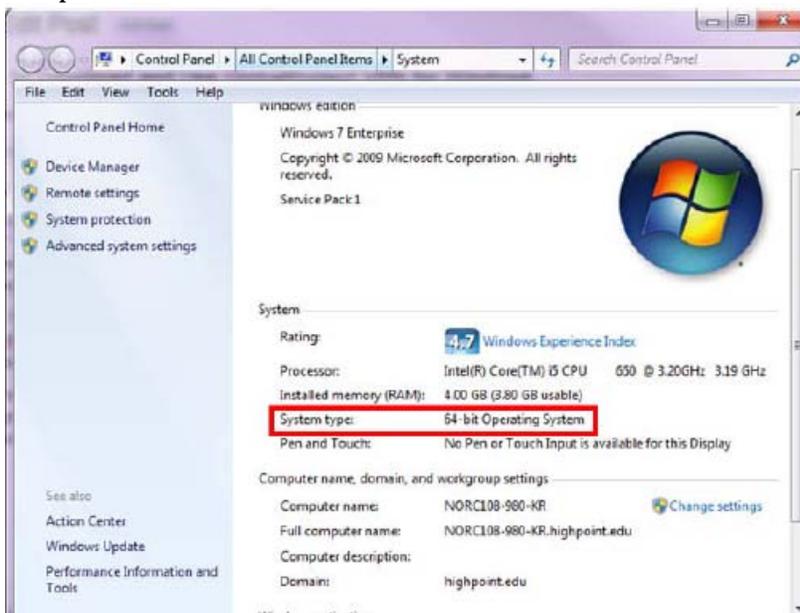

1. Open a web browser and go to <https://webvpn.access-k12.org>

2. Enter your username and password, as follows:

3. There are two versions of GlobalProtect VPN for Windows, 32 bit and 64 bit. To determine which version of Windows your computer is running, right click My Computer and select Properties. On this dialog box, the System Type describes what version of Windows that is installed on your computer.

4. Click the "Download Windows **XX** bit GlobalProtect agent"

Select what is appropriate for your computer.

Palo Alto Networks - GlobalProtect Portal

[Download Windows 32 bit GlobalProtect agent](#)

[Download Windows 64 bit GlobalProtect agent](#)

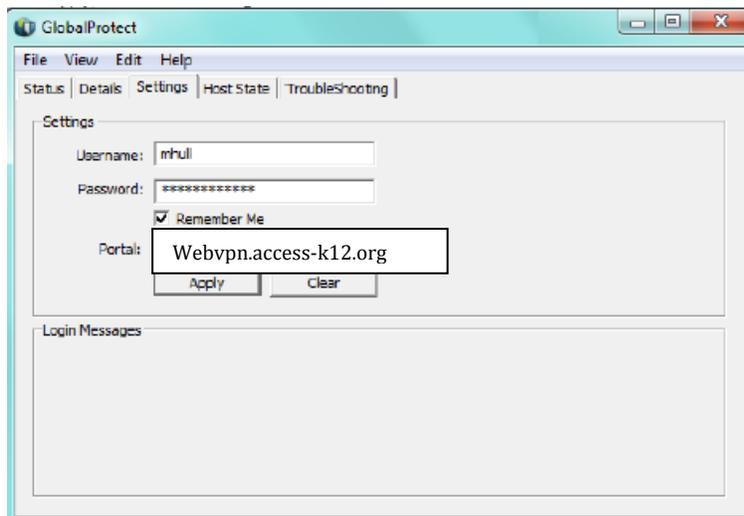

[Download Mac 32/64 bit GlobalProtect agent](#)

Windows 32 bit OS needs to download and install Windows 32 bit GlobalProtect agent.

Windows 64 bit OS needs to download and install Windows 64 bit GlobalProtect agent.

Mac OS needs to download and install Mac 32/64 bit GlobalProtect agent.

5. Install the client using all defaults.
6. When presented with the configuration screen, enter your **username**, **password**, and **“webvpn.access-k12.org”** in the Portal: box.

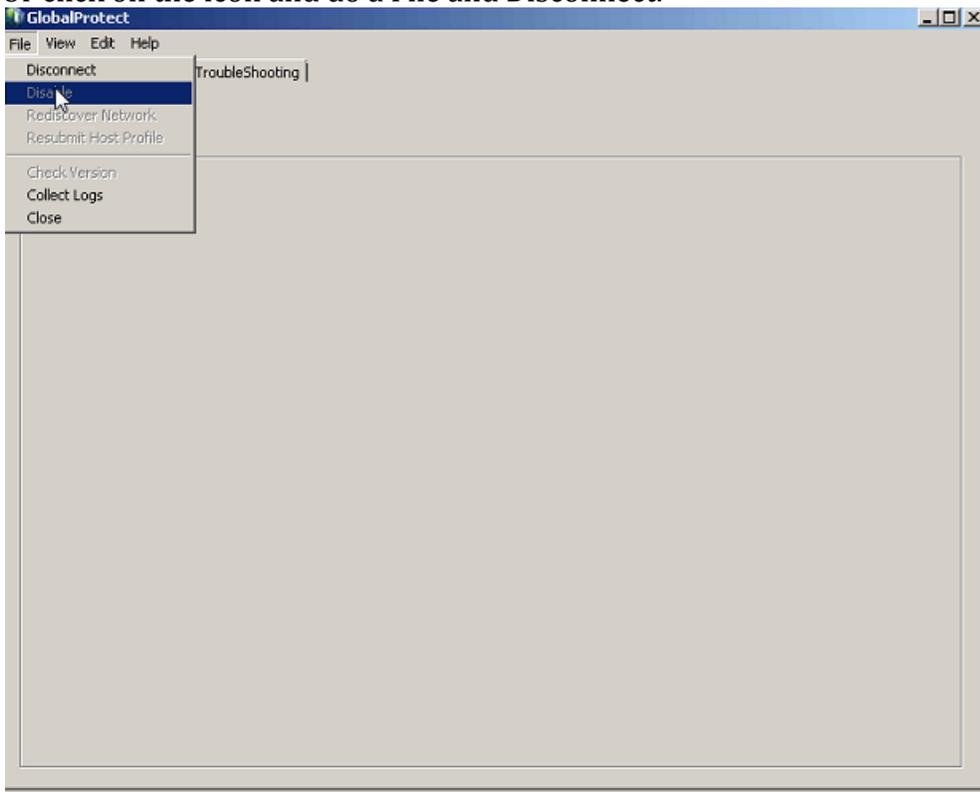

7. Click “Apply”. You will be connected to the ACCESS Network.
8. You will see an icon in the bar at the bottom right of your task bar:

9. To connect and disconnect, simply click on the icon and choose an option

Or click on the icon and do a File and Disconnect.

To reconnect, click on the icon in your task bar.
