Connected IO CM4NA (compatible with Meraki)

Operator certified, secure, and cost-effective, the CM4NA modem is made for industrial M2M- and IoT-enabled solutions. With an innovative, slimline design, the CM4NA is easy to integrate into almost any form factor.

Key Features

Shorten your product development time

Ready to go right out of the box, the CM4NA takes connectivity off your plate, reducing time to market.

See how our modems are used across the globe.

Connected IO modems are used in a wide array of industries and applications, including digital signage, POS, vending machines, security, monitoring and control, and failover.

Specifications

- Frequency Band (MHz)700/850/1700/1900
- SMS Supported No SMS Supported describes the module allows users to receive and sometimes transmit short text messages using their wireless device, where sms is a feature of PCS devices (primarily GSM), SMS messages are small bursts of data which are sent and received like the data packets on dial-up modems.
- Voice Supported: No
- Interface: USB
- Min Operating Temperature (°C)-30 – Max (°C)85
- Generations and Technologies4G/LTE
- Two SMA dipole antennas (included)
