### **Network Services**

**Internet** – Internet access via a digital circuit for the district. The Internet access is filtered to provide a secure environment for students. **(E-rate eligible)**

**E-mail** – E-mail address and mailbox for all students, teachers, and staff. **(E-rate eligible)**

**Voice over IP (VoIP)** – Provides for VoIP services from central ACCESS location. **(E-rate eligible)**

**Voicemail** – Provides voicemail services for district. **(E-rate eligible)**

### **Application Services (minimum \$7,000 commitment per IRN)**

**Student Services**– Student Information System for grade reporting, transcripts, scheduling, attendance, disciplinary action, special education forms and all areas of EMIS reporting.

**Fiscal Services** – Uniform School Accounting System (USAS) and Uniform School Payroll System (USPS), as well as Equipment Inventory System (EIS). These are state-written fiscal packages that meet state standards.

**INFOhio** – Statewide automated library system for the K-12 levels. This includes a statewide Union Catalog listing all materials found in any INFOhio library. This includes Audio Visual materials, Special Education materials, Community Resource Records) listing areas of interest around the state), Venture Capital Records, and the ability “book” these items.

**Dial-up** – Provides for dial up access to the ACCESS network. [Discontinued effective July 1, 2010]

**Remote Access** - Provides the ability for a customer to connect to ACCESS’ services if the customer’s building is outside of the ACCESS Wide Area Network (WAN). This fee is waived for Internet customers.

**Maintenance** – ACCESS will negotiate network maintenance contracts with a preferred vendor, and will sign a master agreement. The school/district will be billed monthly for their contract amount.

**NOTE:**

- 1 District must NOT be a member of another DA Site
- 2 There is an \$7,000 minimum for fees if \*ANY\* application service is purchased, with the exception of Internet access and e-mail. For example, if a customer would like to purchase Student Services, but only has 150 ADM, the calculated price would be \$1,200 ( $\$8 * 150$ ), but a minimum fee of \$7,000 per IRN would apply. However, if the customer is only purchasing Internet and/or e-mail services, the minimum service charge does not apply.
- 3 Fiber connections will be allowed for all current connections plus any other educational entity. New connections by non-member entities will be subject to a \$15,000 one-time connection fee. This connection fee may be split into a maximum of three annual payments if requested by the connecting entity. The connecting entity will also pay all costs relating to the physical connection of the fiber to the entity, including all construction, make-ready, and splicing/termination of fiber strands. Connecting entity will also be responsible for an increased per-ADM charge for Internet services for fiber connectivity.
- 4 Funds made available by the State for non-public schools are to reimburse ACCESS for the connection to ACCESS. This money cannot be used for any other of the above services.
- 5 SERRCs pay a flat fee of \$7,000.
- 6 T-1 Service will be discontinued starting July 1, 2013.
- 7 An Alternate Network Connection may be available in FY2014 and beyond as an alternative to the ACCESS fiber network. Customers will pay a fee to be determined by ACCESS based on the amount of bandwidth requested and the location of the service.
- 8 Wireless network services will be priced depending on district size and density requirements.
- 9 Virtual servers and storage will be priced depending on the number, size, and resources required.
