Greetings Illuminators!

My apologies to those of you who are receiving this message for the second time. It came to my attention after it was sent that our Illuminate contact list was woefully out of date.

I am reaching out to our current Illuminate point of contact list in order to get you ready to use the 2017 version of the Graduation Point Verification report developed by John LaPlante of Youngstown City Schools. In order to make this updated report available to you, you need to have the 2016/2017 OABC (AIR/EOC) results loaded and if you have any, the 2014-2015 and 2015-2016 AP exam results. The process of loading the data from the test vendors' files is very simple and I will be happy to walk you through that process. If you do not have any AP scores, I need to know that as well. Please have the person who will be responsible for loading this data contact me as soon as possible.

Another new addition to this year's report is the ability to enter alternatives to the EOC exams (transcripted credit from another district, waived courses, 9th grade courses, etc.). I have already created the necessary Summary Assessment in Illuminate for each of your districts but I need to know who will be entering that data into Illuminate for your district so that I can share that assessment with them.

If you are not the proper person to receive this email or if you would like to have somebody else from your district added to our POC list as well, please let me know and I will adjust the list accordingly.

Best wishes,  
Becky
